MAZHARUL ISLAM

Software & Product Engineer

mie.mazharul@gmail.com • github.com/cloud-007 • www.linkedin.com/in/-mazharulislam-/ • x.com/mie_mazharul • Paderborn, Germany

SUMMARY

I build Python backends, web and mobile applications, and applied AI workflows. Previously Senior Software Engineer at LII Lab, with 3.5 years of production experience. Now based in Paderborn, Germany, studying M.Sc. Computer Science and building independent software products.

TECHNICAL SKILLS

Languages and Frameworks: Python · Django · FastAPI · Flutter · Next.js · TypeScript

Databases and Messaging: PostgreSQL · Redis · Celery

AI and NLP: Speech evaluation · LLM APIs · OCR · Hybrid retrieval · Structured outputs

Infrastructure and DevOps: Git · Docker · Google Cloud · Firebase · Prometheus · Grafana

AI-Assisted Development: Claude Code · Cursor · Agentic workflows

PROFESSIONAL EXPERIENCE

Independent projects & client work

Paderborn, Germany

Independent Product Engineer 05/2026 - Present

Building and maintaining web products and applied AI tools alongside independent technical education. Client delivery, personal projects and interview take-homes are identified separately in the work below.

- Delivered SushiLab, a bilingual restaurant ordering website, and continued improving its ordering flows.
- Built a document-to-draft workflow with source-linked evidence for an AI Engineer take-home.
- Built crosspost with media validation, dry-run previews and resumable publishing.
- Create technical explainers as theainativeengineer.

Stack: Python · FastAPI · Next.js · TypeScript · LLM APIs

LII Lab

Sylhet, Bangladesh

Senior Software Engineer 01/2025 - 04/2026

Led backend engineering for OneIELTS and OnePTE at LII Lab.

- Built backend services for assessment, content management and subscriptions.
- Implemented tenant isolation, custom domain routing and configurable scoring for a short-lived institute-focused version of OneIELTS.
- Integrated speech recognition, pronunciation assessment and NLP services.
- Implemented subscription billing across five providers with idempotent payment webhooks.
- Added API monitoring with Prometheus and Grafana; reviewed code and supported junior engineers.

Stack: Python · Django · FastAPI · PostgreSQL · Redis · Celery · Prometheus · Grafana

LII Lab

Sylhet, Bangladesh

Software Engineer 11/2022 - 12/2024

Developed Flutter learning applications and Django assessment services.

- Built practice and mock-test workflows with audio recording, timed progression and score breakdowns.
- Connected mobile clients to assessment APIs and implemented purchase verification.
- Built question-bank administration and learning analytics.
- Contributed to 93+ production releases across the full November 2022–April 2026 LII Lab tenure.

Stack: Flutter · Dart · Riverpod · Python · Django · PostgreSQL · Firebase

SELECTED PROJECTS

Grounded Legal Drafting, Document-to-draft workflow with traceable evidence — 2026

- Built parsing, entity extraction and hybrid vector/keyword retrieval.
- Checked generated claims against supporting evidence.
- Captured operator edits and reused style rules during regeneration.

Stack: Python · FastAPI · SQLite · OCR · Gradio

crosspost, Publishing that can resume after partial failure — 2026

- Validated media and platform requirements before uploading.
- Added dry-run previews to inspect the intended publication.
- Tracked successful posts so retries can resume without repeating completed uploads.

Stack: Python · OAuth · YouTube API · Meta APIs

Sushi Lab, Bilingual restaurant ordering and marketing platform, Chartres, France — 2026 – present

- Replaced cluttered navigation with clear routes to the menu, delivery and takeaway.
- Connected orders and reservations to customer confirmations, restaurant email and Telegram alerts.
- Supported French and English, mobile and desktop, schedule-ahead orders and lunch-hour availability.
- Kept the initial scope lean and continued iterating on how customers used the site.

Stack: Next.js · React · TypeScript · Zustand · next-intl

COMPETITIVE PROGRAMMING AND ACHIEVEMENTS

2000+ problems solved · 300+ contests · 1603 codeforces peak · 1965 codechef peak

Champion at the National Hackathon, LU CSE Carnival

IEEE Outstanding Leadership Volunteer Award

Runner-up in Bangladesh at IEEEXtreme 16.0

Codeforces (Max 1603) · CodeChef (Max 1965)

EDUCATION

Paderborn University — Paderborn, Germany

M.Sc. Computer Science · Enrolled for Winter Semester 2026/27. — Oct 2026 - present

Leading University — Sylhet, Bangladesh

B.Sc. in Computer Science and Engineering · CGPA 3.60 / 4.00 — Degree awarded 2023

VOLUNTEERING

IEEE Computer Society, LU Student Branch Chapter

Chair — Apr 2022 - May 2023

Leading University Computer Club

ACM Coordinator — Jan 2022 - Dec 2023
