

MD MAZHARUL ISLAM EMON

Senior Software Engineer

8801794405314 • mie.mazharul@gmail.com • <https://github.com/cloud-007>

Summary

Passionate Software Engineer with 3+ years of experience in developing web applications and backend systems. Skilled at writing clear, concise code that is easy to maintain and troubleshoot. Experienced in working with both small and large teams across multiple projects and companies. Able to work independently of remote locations or in office environments as needed by the company.

SKILLS

Backend: Python • Django • Django REST Framework • PostgreSQL • Redis • Celery • REST APIs • Query Optimization • Caching

Infrastructure: Docker • Nginx • CI/CD • GCP • DigitalOcean

Frontend / Mobile: Flutter • Firebase • React.js • Next.js

Engineering: System Design • Product Development • Requirement Analysis • Code Review • Technical Leadership

PROFESSIONAL EXPERIENCE

LII Lab Sylhet, Bangladesh

Senior Software Engineer 01/2025 - Present

- Led backend and product engineering efforts for OnePTE and OneIELTS, enhancing question management and scoring workflows.
- Designed and maintained backend services utilizing Django REST Framework, PostgreSQL, Redis, and Celery.
- Achieved a 70% reduction in API latency and a 50% decrease in infrastructure cost through strategic optimizations.
- Developed robust backend systems for exam management, payment processing, and analytics, boosting overall platform efficiency.
- Directed requirement analysis, transforming product needs into actionable technical tasks and supporting delivery planning.
- Mentored engineers and ensured high development quality through thorough pull request reviews.
- Facilitated effective deployment and cloud operations with technologies like Docker, Nginx, GCP, and DigitalOcean.

LII Lab Sylhet, Bangladesh

Software Engineer 11/2022 - 12/2024

- Contributed to backend development for OnePTE using Django REST Framework and PostgreSQL.
- Built APIs and backend logic for billing, exam engine, question bank, and practice workflows.
- Worked on backend implementation, deployment, analytics, and product-focused engineering tasks in a startup environment.
- Built backend tests using pytest and developed Python scripts for reporting, data analysis, and operational support.
- Made major contributions to the OnePTE Flutter app by building 50+ screens and key features including payment processing, response recording, notifications, Firebase Analytics, and Crashlytics.
- Contributed to moderator and admin dashboard features, including KPI-focused reporting and analytics visibility.
- Supported production deployment and server operations as part of a broad product engineering role.

Projects

Projecto | Django-based Project Management System 10/2022 - 12/2022

- Built a project management system using Django, AJAX, jQuery, and Bootstrap for handling and evaluating university projects.
- Integrated Gmail notifications and a background job service for task-related operations.

Reachout | Flutter-based Consultation MVP 10/2023 - 10/2023

- Built a Flutter MVP for connecting users with consultants, including Google Sign-In and chat-related features.
- Used Clean Architecture and Riverpod to create a structured and scalable codebase.

Education

Leading University Sylhet, Bangladesh

B.Sc. in Computer Science and Engineering | GPA: 3.6 / 4.0 09/2018 - 12/2022

Competitive Programming & Achievements

Solved **2000+ problems** across several online judges and participated in **300+ online and onsite contests**.

Champion, LU CSE Carnival National Hackathon 2023 | Team: **LU Ovream**

Runner-up (Bangladesh), IEEEExtreme 16.0 (2022) | **Global Rank 149** | Team: **LazySquad**

ICPC: 87th out of 1700+ teams in Regional Preliminary 2021; 51st in Dhaka Regional 2020 Main Round

Champion, LU TechStorm 4 Programming Contest 2021

Handles: Codeforces (Max: **1603**), Codechef (Max: **1965**), LightOj

Volunteering

IEEE Computer Society LU SB Chapter

Chair

04/2022 - 05/2023

- Helped establish the chapter and launch key community initiatives.
- Organized seminars, webinars, and technical events with participation from students and industry speakers.
- Guided community-building efforts that increased membership by 20%.
- Organized technical learning activities, including a Flutter bootcamp.
- Served as a judge and problem setter for programming contests.

Leading University Computer Club

ACM Coordinator

01/2022 - 12/2023

- Conducted peer-to-peer sessions on Data Structures and Algorithms.
- Mentored juniors and peers in competitive programming and problem solving.
- Helped build a collaborative learning environment for programming contest preparation.
